

**Pennsylvania Department of Corrections
Coronavirus Supplemental Screening for Visitors**

CDC is closely monitoring an outbreak of respiratory illness caused by a novel (new) coronavirus (named “2019-nCoV”) that was first detected in Wuhan City, China and which continues to expand. Infections with 2019-nCoV, most of them associated with travel from Wuhan, also are being reported in a growing number of international locations, including the United States, with the virus reportedly spreading from person-to-person.

Medical personnel should complete this form if a visitor exhibits signs or symptoms commonly found with 2019-nCoV (fever, shortness of breath).

Visitor Name:		DOB:	
Visiting Inmate Number:		Date/Time:	
1.	Does the visitor exhibit signs of a fever or lower respiratory illness? (e.g. cough, shortness or breath)	Yes	No
2.	If “Yes” to number 1, did the visitor spend time in China, Iran, South Korea, Italy, or Japan? If “Yes”, when _____	Yes	No
3.	If “Yes” to number 1, did the visitor have close contact with a person who is under investigation for 2019-nCoV while that person was ill?	Yes	No

For an individual answering “Yes” to any of the above questions, immediately deny the visit and direct them to their local healthcare provider. Medical personnel shall immediately notify the Medical Director, CHCA, Shift Commander, and Infection Control Nurse.

If NO: individual is clear for purpose of this screening.

Completed by:

Printed Name: _____ **Date/Time:** _____

Shift Commander Name: _____ **Date/Time:** _____

Note:

Close contact is defined as:

- a. Being within approximately 6 feet (2 meters) or within the room or care area for a prolonged period of time (e.g. healthcare personnel, household members) while not wearing recommended personal protective equipment (i.e. gowns, gloves, respirator, eye protection).
- b. Having direct contact with infectious secretions (e.g. being coughed on) while not wearing recommended personal protective equipment.
